

TVX-EWS

Connected to the TeamVOX main video platform through a dedicated link to a private cloud, the **TVX-EWS** workstations provide the safe keeping and management of video evidence provided by TVXBC1 body cams in the field.

The Windows 10 OS workstations run the TeamVOX Evidence Management Suite application allowing the simultaneous connection of up to 30 **TVX-BC1** cameras and their instant management on the platform's interface. Equipped with a 21.5" Touch screen, industrial quality keyboard and mouse and a 3.6 Ghz speed Quad Core i3 processor and RAM memory of up to 8GB and 8TB of internal storage it provides an optimal performance digital evidence analysis.

DESCRIPTION AND CHARACTERISTICS

The platform requires licensing per device to be managed and for the number of workstations that will connect it. Within the reports, it is possible to show photos, videos and audio recordings uploaded by the users.

It is possible to verify the photographs and recordings record list.

Being a multi-user system, it allows the operator to manage any device on the network, local or remote, through the permissions granted for this purpose.

The operator can clearly observe the progress of the collection of Evidence, through the graphical status monitoring interface and attach all the evidence of the incident in process.

Friendly interface for the administrator or TeamVOX user has the ability to manage (review, download, delete, etc.) all the files generated by the cameras in a single administration point, which allows you to review by user, date, event, video clips. The terminal station allows the update and scalability necessary for the growth of the system and thus satisfy the operational needs for the security team where it will be implemented.

The digital evidence display system is password protected for the administration, check and reproduction of the files, in all the formats in which they were generated (AAC, MP3, MP4, JPG, TXT, etc.)

The TeamVOX Evidence Management Suite operator has the ability to manage all the files generated by the cameras in a single administration point, which allows you to review the video clips by user, date, or event. You can also have the administrative permissions to manage the files and delete those that you do not consider relevant to document an event, generate reports and share them safely with the users you want. Password-protected digital evidence display system for the administration, review and reproduction of files.

OS	Windows 10
Processor	4 cores i3 Processor (3.6 Ghz)
Memory	8GB RAM upgradeable
Display	21.5" Capacitive touch
Internal storage	8TB
NAS Storage	High Capacity Network Storage Unit NAS16TB Available in a RAID5 Array
Power backup	Regulated UPS 1500VA/ 127 VAC/ 60 Hz
Keyboard	Industrial Type
Mouse	Industrial Type

INCLUDES:

- Power cables and interconnection cables for TVXBC1
- Ports for connecting the body-cam with the PC terminal (IDS)

WARRANTY:

- 2 years manufacturing defects warranty
- Restrictions Apply

This device has been optimized to run the following application:
TeamVOX PTT
